

Software Requirements for Mastering OAuth 2.0

Chapter number	Software required (with version)
4	Modern web browser Recommended: Firefox 38+ Chrome 43+
5-8	HTML5 JavaScript 1.8 jQuery 1.11.x
6-9	Java 8 Eclipse 4.x.x Apache Tomcat 8.x.x Apache HTTPClient 4.x
11	curl 7.x.x (http://curl.haxx.se/download.html)

Note: For chapters 1-4, nothing. No coding is done there (although I have added a row for chapter 4 which requires a browser for registration).

For the chapters beyond 6, it will be the same as the ones in chapters 5 and 6 since we will simply be building upon those applications. I've added chapter ranges, so hopefully this is more clear.
